Hey Lindsey,

Could you please send me the updated invite? I think you accidentally sent both to my personal email.

To discuss concerns over update PCTn values from HED:

Assuming 66% is across the entire use area (FL and TX), are our risk numbers going to be protective for both states?

If using 64% is protective, using 66% has to be protective.

National PCT for FL only should be lower, since fewer national acres present in FL than in FL and TX.
